PROFESSIONAL SUMMARY

Detail-oriented commerce graduate with hands-on experience in data science, data handling, Microsoft Excel, and programming (Python, C). Certified in MS-CIT with practical exposure to data entry, cleaning, validation, dashboard creation, and banking operations. Adept at using Excel functions, pivot tables, macros, and Python scripting to streamline data processes. Seeking a data analyst or data handling role where I can contribute to efficient data management and support decision-making through accurate reporting.

PROFESSIONAL EXPERIENCE

Data Science Intern **January 2025 – April 2025**
[Ineuron.ai], Remote

- Assisted in collecting, cleaning, and preprocessing datasets using Python (pandas, NumPy) for analysis and reporting.
- Built Python scripts to automate Excel data cleaning tasks, reducing manual processing time by 70%.
- Developed and maintained interactive Excel dashboards to visualize sales trends and key performance indicators.
- Collaborated with the team to identify data quality issues and implemented validation rules to ensure data integrity.
- Prepared weekly summary reports and data insights to support decision-making by senior analysts.

Bank Employee **January 2024 – January 2025**
SHDNL Bank

- Managed and maintained accurate customer records and transaction data using banking software and Excel.
- Performed daily data entry, verification, and reconciliation of financial records with high accuracy.
- Prepared monthly attendance and payroll-related reports for the HR department using Excel functions (COUNTIF, SUMIF).
- Ensured data confidentiality and compliance with internal banking data handling policies.
- Assisted in generating MIS reports and dashboards to support branch management decisions.

TECHNICAL PROJECTS

Python Script for Excel Data Cleaning **January 2025 – April 2025**

- Developed a Python script using `pandas` and `openpyxl` to clean and standardize large Excel datasets (remove duplicates, fix formatting, handle missing values).
- Automated the generation of summary statistics and exported clean files ready for analysis, cutting manual effort by 70%.
- Published the script on GitHub with full documentation for team reuse and collaboration.

Excel Sales Dashboard for Retail Store **May 2024 – January 2025**

- Built an interactive Excel dashboard using pivot tables, slicers, and charts to track daily sales, top products, and regional performance.
- Integrated data from multiple CSV files using Power Query, enabling automatic updates with new data.
- Enabled store manager to identify slow-moving items and optimize stock levels, reducing excess inventory by 15%.

Employee Attendance Tracker (Excel) **January 2024 – May 2024**

- Designed a monthly attendance tracker with conditional formatting to highlight absences and late arrivals.
- Used COUNTIF and SUMIF functions to calculate attendance percentages and overtime hours automatically.
- Implemented password protection for sensitive data and shared with HR for payroll processing.

EDUCATION

Bachelor of Commerce (B.Com) **2025**
Shree Gadge Maharaj Mahavidyalaya, Murtijapur (Akola)
Yashwantrao Chavan Maharashtra Open University, Nashik **64.17%**

CERTIFICATIONS

- MS-CIT (Maharashtra State Certificate in Information Technology) **2019**
- Python Programming Certification **2024**

TECHNICAL SKILLS

Data Science & Analysis: Python (pandas, NumPy, openpyxl), Data Cleaning, Data Preprocessing, Statistical Analysis

Data Handling & Reporting: Microsoft Excel (Pivot Tables, VLOOKUP, Macros, Power Query), Data Entry, Data Validation, Charts & Dashboards

Programming: Python (scripting, automation), C Programming (fundamentals)

Tools: MS Office Suite (Word, PowerPoint), Google Sheets, VS Code, GitHub

Other: MS-CIT Certified, Banking Operations, Typing Speed: 45 WPM, Attention to Detail, Problem Solving
